Re: U.S. Patent Application Serial Number 10/034,540 – Our SP01-332	

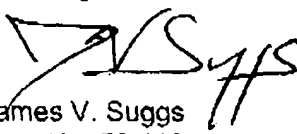

Examiner Derrington-

Attached please find the four Japanese references we discussed today. I've got only an abstract for one, and machine translations of the other three (as noted on the PTO-1449).

While I'm typing, I thought I'd confirm the language I just suggested for claim 9:

"9. The method of claim 2, wherein the precursor is aluminum acetylacetonate, and wherein the first temperature is between 100°C to 160°C, the second temperature is between 0°C and 10°C below the first temperature, and the third temperature is greater than 175°C"

Have a great weekend,

James V. Suggs
